Issued & Outstanding

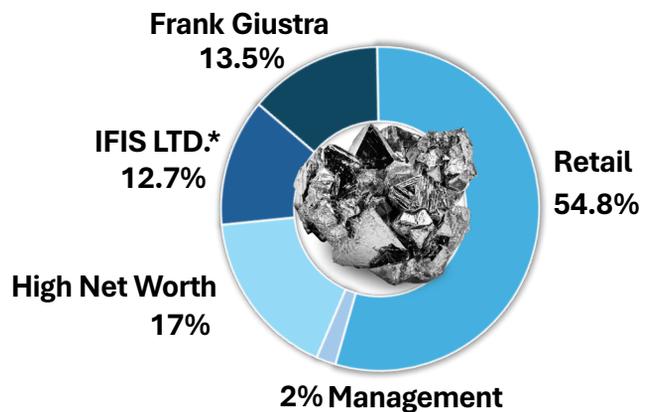

Common Shares	197,469,377
Stock Options	19,313,000
Warrants	14,845,000
Fully Diluted	231,627,377

C\$11 Million in working capital

Updated on June 20, 2025

Zero debt

No pending property payments

*Controlled by Mr. Eduardo Elstain

UPCOMING CATALYSTS

- Phase 2 exploration program ongoing
- First-pass drill program: ~4,000m → 15% confirmation drilling, 25% resource expansion, and 60% exploratory drilling (targets adjacent to MRE)
- Post Phase 2 exploration of at least 10,000m
- Continue aggressive exploration strategy, with the goal of continually increasing the total ounces at Quevar South, while further exploring undeveloped targets at Quevar North & Azufre
- Upcoming drill results expected by late-July
